TYBCA Project Synopsis Format

1. Title Page

- Project Title
- Submitted By (Student Name & Roll No.)
- Course: TYBCA
- College Name
- University Name
- Project Guide Name
- Academic Year

2. Introduction

- Background of the project
- Overview of the system
- Need for the project

3. Problem Statement

- What problem are you solving?
- Limitations of the existing system

4. Objectives of the Project

- Main objective
- Sub-objectives (in bullet points)

Example:

- To automate manual processes
- To maintain secure records
- To reduce human errors

5. Scope of the Project

- Where the system will be used
- Who will use it
- Future enhancements

6. System Requirements

□ Hardware Requirements

- Processor
- RAM

- Hard Disk

Software Requirements

- Operating System
- Programming Language
- Database
- Tools / IDE

7. System Methodology

- Development model (Waterfall / Agile)
- Steps followed in development

8. System Design

- Data Flow Diagram (DFD)
- ER Diagram
- Use Case Diagram
- System Architecture

9. Modules Description

Explain each module briefly.

Example:

- Admin Module
- User Module
- Report Module

10. References

- Books
- Websites
- Journals
